Range

I am looking for a salary in the range of to annually.

Focus on skills & experience

I believe a salary in that range is appropriate given my skills and experience.

Back question : What is the salary range for this position ?

Wordings HR like , and it sound professionally

- Responsible
- Willing to learn
- Team player
- Problem-solving
- Adaptable
- Detail-oriented

HR don't like

- Very short answer : Only Yes, no
- Answer with negative idea with the previous company
- Throw the mistake or error to other
- Personality look non-active for working

Questions HR always ask :

1.

Tell me about yourself.

Answer:

I am a Computer Engineering graduate with hands-on experience in cybersecurity and network-related projects. I completed an internship where I worked on vulnerability assessments, Linux system administration, and basic network security analysis. I am looking for an entry-level position where I can further develop my technical skills and contribute to the team.

2. Why do you want to work in cybersecurity/network engineering?

Answer:

I am interested in cybersecurity because I enjoy analyzing systems, finding vulnerabilities, and improving security. I like solving problems, and I believe cybersecurity is an important field that protects organizations and users from real-world threats.

What are your strong points ?

Answer:

One of my strengths is problem-solving. During my internship, I analyzed security issues and used tools like Nessus and Nmap to identify vulnerabilities. I am also a fast learner and always willing to improve my skills.

What is your weak point ?

Answer:

My weakness used to be time management when handling multiple tasks. However, I now use task lists and priority planning to manage my work more effectively.

What cybersecurity tools have you used?

Answer:

I have experience using Nessus for vulnerability scanning, Nmap for network scanning, Burp Suite for web security testing, and Wireshark for network traffic analysis. I also use Linux for system administration tasks.

Can you describe one of your projects?

Answer:

One of my projects was an Attack Surface Management system. I developed an automated vulnerability management tool using Python and JavaScript. It used Nmap and Masscan to scan networks and visualize exposed assets, helping organizations monitor security risks.

How do you handle problems at work?

Answer:

First, I try to understand the problem clearly. Then I analyze possible solutions using my knowledge and documentation. If I still cannot solve it, I ask my teammates or seniors for advice.

Why should we hire you ?

Answer:

I am motivated, eager to learn, and have hands-on experience from my internship and projects. I may be a fresh graduate, but I am hardworking and ready to grow with your company.

What are your career goals?

Answer:

My short-term goal is to gain real-world experience and improve my technical skills. My long-term goal is to become a skilled cybersecurity engineer who can design and protect secure systems.

What salary do you expect?

Answer:

Based on my skills and market research, I expect around XX,XXX–XX,XXX baht per month. However, I am open to discussion depending on the role and responsibilities.
